EyeCGas® CO₂

Designed for the oil & gas, utilities, nuclear energy, and steel industries:

- **Instant ROI** - Can cut downtime from 3+ days to 1 day from plant shutdown to final leak repair verification.
- **High sensitivity detector** - Can pinpoint tiny CO₂ tracer gas leaks in Hydrogen, Nitrogen, and dry air at less than 3% concentration in generation, processing, and manufacturing operations.
- **Certified for use in hazardous environments** - Class 1, Div. 2, ATEX II.
- **Repair confirmation** - Gives visual verification of completed repairs so operations can be safely resumed.
- **Intelligently designed** - Provides up to 6 hours of visual and IR video with audio recording on the same file.
- **Snapshot feature** - When downloading the files from the camera, Artsoft will create a snapshot from the first frame of each video for easy reference and documentation.
- **Large color LCD screen** - With intuitive user interface.
- **IP65, rugged and durable** - Designed for use in the field.

High sensitivity to a spectrum invisible to the human eye makes EyeCGas® CO₂ a critical Optical Gas Imaging tool for fugitive emissions detection and leak repair verification.

Instantly visualize the exact location of CO₂ leaks, even at a distance.

Specialized

EyeCGas® CO₂ is an infrared camera specially designed for high sensitivity CO₂ detection for oil & gas, utilities, nuclear energy, and steel market requirements.

Field productivity

Ruggedized and hazardous environment certified, the EyeCGas® CO₂ broadens opportunities for use within the facility limits while maintaining safety, without the need of a “hot work” permit.

Powerful but simple

The EyeCGas® CO₂ allows for fast inspection of vast areas with a simple and intuitive user interface.

No more guesswork

The EyeCGas® CO₂ includes a large LCD display and a digital CCD camera for fast recognition of the components being inspected or leaking.
